Request latest "Measured" Weather Data:
The User requests the data last (automatically) measured by the System:

1. Temperature

2. Humidity

3. Barometric Pressure

4. Dewpoint

5. Heat Index

In the appropriate Units

1. Metric

2. English

3. Absolute (SI–if different from Metric)

The System locates the latest archived data for the desired measurement. The System returns the requested data in the requested Units.
